retweet **Miloco Studios** has announced new partnerships with Unity Mastering and Blue Pro Mastering.

Miloco has stated that the mastering arena was already "competitive enough" and, as such, decided to team up with two existing Mastering studios to launch the new venture.

With 18 studios spread across the UK and Europe, Miloco now offers full services from pre-production through to manufacture.

Located in Maida Vale, North West London, Unity is a double height daylight mastering room built by one of the UK's top mastering engineers, Chris Parmenidis. One of Unity's unique qualities is its unusually high ceiling. It offers a full vinyl cutting console run by a Maselec MTC2, designed by the legendary genius engineer / producer / designer, Leif Masses.

Madonna, Jay Sean, Sugababes, Amy Winehouse, Josh Ritter, Portishead, Mika, Paolo Nutini and Groove Armada have all used Unity's services in the past.

Blue Pro Mastering was founded by Alexander Balfour in 2001. Based in Hornsey, North London, Blue Pro offers audio mastering in addition to both CD & DVD Duplication and Replication services. The studio is built around the Maselec MTC2 but includes many other options from Maselec as well, such as the classic MEA-2 Equaliser, MLA-2 Compressor and a more recent addition, the MPL-2 De-Esser and Brickwall Limiter. Blue Pro's resident engineers are John Webber and Jerome Schmitt.
